Overview

Realizing real movement, building the economy of the family, people, nation and state, for the sake of the rise of the global economy

Gold mining in Indonesia began more than a thousand years ago with the arrival of immigrants from China who mined gold in several areas, followed by the Hindu Age, Dutch and Japanese occupation. During the Dutch colonial era (1600-1942) the development of gold mining was very limited. Several gold ore reserves discovered during this period were in the Lebong area, namely Lebong Donok and Lebong Tandai, Bengkulu Province. Another gold deposit discovery was in the South Banten area known as the Cikotok gold mine owned by PT Aneka Tambang. Apart from that, there were also other relatively small discoveries of gold deposits.

In 1939, total gold metal production was recorded at 2.5 tons, half of which came from Lebong Tandai. During World War II, all of these gold mines were closed and after the war only a few mines were reopened including the Cikotok Gold Mine. Gold production since the end of World War II until the mid-1980s did not show a significant increase. Total recorded production in 1985 amounted to around 2.6 tons, with more than 90% of this amount being a by-product of copper concentrate produced by PT Freeport Indonesia in Papua (formerly Irian Jaya).

Profile

PT. Mulya Timur Global is a company that manages business units engaged in the gold mine. PT Mulya Timur Global has underwent several changes.

The last change is the Declaration Deed Resolution of Shareholders No. 08 dated 13 November 2023 made in Notary Asep Dudi Suwardi, S.H, SPN and approved based on Acceptance Notification of Company Data Changes Number: AHU-0071866.AH.01.02 dated 21 November 2023

We started a business in mining, trading and gold refining in eastern Indonesia, especially the Papua region, Nabire because as we all know Papua is an Indonesian region that has the potential to be the biggest gold producer.

Our gold mining is located in nabire papua with A land area of 100,000 ha and we are processing for A 5.000 ha iup concession. At the beginning of next year we will be doing exploration mapping with world class companies so that the mining we have produce large gold and can contribute to the nation and the country

Our refining factory is in Tangerang and our Gold Dores Logistic Centers are in Banda Aceh, Pangkalan Bun, Manado , Halmahera and Nabire.

Visi Vission

Become a leading gold company from the region has national network and international brand

Menjadi perusahaan emas terkemuka yang memiliki jaringan baik nasional maupun internasional

Why Choose Us?

PT. Mulia Timur Global is a company that was established in 1912. Initially it was in the form of a local cooperative founded by an indigenous tribe in the Nabire area, where Ulayat Land was traditionally managed by one of the tribes in the interior of Papua. With all the limitations and not supported by investors both from within and outside the country and even from the local government. We are still in high spirits. that the sons of the Papua region, especially the Waray tribe, must stand up and move forward.

As time went on, we received brilliant suggestions and insights from the Waray tribe's Anak Adat who came from the Javanese, namely Mr. Budy Widiyanto, our enthusiasm grew stronger and higher, so that a company called PT. MULIA TIMUR GLOBAL, which means that we, the Waray tribe from the eastern tip of Indonesia, have noble aspirations to advance Indonesia in general and the Waray Tribe of Papua in particular.

We hope that our aspirations from the Waray tribe, which are assisted and carried out by our Anak Adat, namely Mr. Budy Widiyanto, can run and succeed in accordance with our aspirations.

Thank you

NIKSON WARAY

Our Products

Gold Granules

Granular gold is a type of gold that looks like powder and has a very fine texture. This type of gold is rarely found for investors to buy, because it is more often used by gold artisans. With this powdered gold, artisans process it into derivative products with a mixture of gold, one of which is to make jewelry with low grades and low prices.

Gold Bar

Types of gold bars are the most widely used gold for investment. Gold bullion is also often referred to as bullion. Gold which is often used for this investment has a very pure gold content, up to 99.99%. Not just any company can produce this gold because it has to pass certain certifications. The weight of gold bars also varies, ranging from 1 gram, 5 grams, up to 1,000 grams.

Gold Bar Mini

Now there are also mini-sized types of gold bars, starting at 0.1 gram, 0.25 gram and 0.5 gram. The price is priced according to the weight of the gold bar
